# SKILLS

I have been working with the web since its inception in the 90's. As a full stack developer, I am proficient in PHP, HTML, CSS, Sass and JavaScript. While working as a freelancer, I have built many projects using the SilverStripe CMS and framework. Most of these projects have used responsive web design (Bootstrap) with a custom Webpack workflow for front-end bundling. For package management, I use Composer, NPM and Yarn. I maintain the source code for projects using Git and private repositories hosted on Bitbucket. For automated server deployment, I use Deployer with Linux-based VPS hosting.

# **TESTIMONIALS**

# David Wild — Cancer Council ACT

"Colin developed our current website in 2014. Since then, he has provided excellent ongoing website support whenever required. Colin's professionalism, knowledge and competitive pricing made him the right choice to meet our organisation's needs."

### Sam Moran — Entertainer

"Colin provided a site of the highest quality. It was very slick, but also easy to update and maintain. More importantly, it was extremely robust and responded well when the site received a wave of unexpected traffic. I would not hesitate to recommend his services."
